

Ready for anywhere

AMX™ Traveller

AMX Traveller is a commercial configuration of the Traveller.

gehealthcare.com

A compact system

AMX Traveller is a commercial configuration of the Traveller.

with a full range of motion

AMX Traveller is a highly functional, ultra-mobile X-ray system with all-around positioning flexibility.

This compact, mobile X-ray system fits an entire radiographic room in a small, 240 kg unit. Set it in motion with a light push. Then easily maneuver it through tight spots with its oversized rear wheels and swiveling front wheels. Need to make a quick stop? Release the handle to cautiously bring it to a standstill.

Once in place, the X-ray tube rotates on both the X-axis and the Z-axis. The entire column rotates as well. That's three levels of rotation for easy positioning in any situation.

AMX Traveller is small, yet highly functional. It comes with an easy-to-use APR preloaded with 32 different techniques. And with a 32 kW generator, it has the perfect amount of performance to do everything you need it to do.

- 1 Ring-style handle
- 2 Tube rotates up to 180°
- 3 Latch to secure arm
- 4 Recessed storage tray
- 5 Safety brake
- 6 Universal cassette bin

Moves with just 4-6 kg of force

Three levels of rotation for easy positioning

Weighs 240 kg

Short, compact design fits in tight places

GE Healthcare is a leading global medical technology and digital solutions innovator, GE Healthcare enables clinicians to make faster, more informed decisions through intelligent devices, data analytics, applications and services, supported by its Edison intelligence platform.
